

Specialist high performance extinguishers designed to stop lithium-ion battery fires fast

Lithium-ion batteries present a more frequent fire hazard each day as the number of consumer and industrial goods powered by these batteries increases. They are used in power tools, computers, personal devices, scooters and bikes, cars, forklift trucks and other factory equipment and much more.

The dangers they pose are prominent as a lithium-ion battery fire may result from physical damage that causes a short circuit, overheating, internal cell failure, short circuits, or manufacturing defects.

Conventional fire extinguishers cannot effectively extinguish a lithium-ion battery fire. Only a specialist extinguisher such as the Firechief Lith-Ex extinguisher is suitable on this type of fire.

How do Firechief Lith-Ex extinguishers work?

Firechief Lith-Ex extinguishers contain Aqueous Vermiculite Dispersion (AVD), a revolutionary fire extinguishing agent. The water content of the extinguisher cools the fire source, while the Vermiculite platelets encapsulate the fuel source creating a thermal barrier to prevent propagation of the fire. The Vermiculite film is not electrically conductive. AVD is nearly twice as effective as water on a Class A fire and is environmentally friendly.

Applications

Firechief Lith-Ex extinguishers are suited to confined spaces where fires need to be suppressed in their infancy before developing into a fully established fire.

They can also be used to protect against fires where batteries are under charge and where batteries are stored, for example, goods distribution, battery collection bins, battery recycling locations, public services, and battery charging stations.

Features

- ✓ Hot work compliant
- ✓ Easy to store
- ✓ Non-toxic
- ✓ Environmentally friendly
- ✓ 5 year guarantee
- ✓ Available in 5 sizes up to 9 litre; 0.5, 1 , 2, 6, 9 litre (0.5 is the most popular as a home fire extinguisher)
- ✓ Kitemark approved (Models FLE2, FLE6, FLE9)
- ✓ Can extinguish lithium-ion battery fires, uncontrollable by other extinguisher types
- ✓ Quickly cools and prevents excessive heat, forming a thermal barrier to stop fire propagation
